

Steps to take a new project to deployment

GITHUB

Log into github

Create a new repository

Once you have a new named repository got to the local machine steps

LOCAL MACHINE

-In terminal run these commands

```
git init
```

```
git add README.md
```

```
git commit -m "first commit"
```

```
git branch -M main
```

```
git remote add origin https://github.com/OJ42/repositoryname
```

```
git push -u origin main
```

-Those commands connect the local computer to github

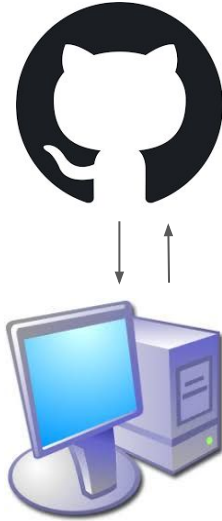

-Once connected use these commands

```
git add .
```

```
git commit -m "commit changes"
```

```
git push
```

-to make changes to your github project from your terminal

HEROKU

Log into Heroku and choose to create a new app

Name the app

Connect the app to the github repository

(Heroku can be changed to whatever hosting platform you choose)
